Drive easier MIPS reporting and higher scores with MIPSpro and ModMed

Healthmonix and ModMed have worked together to provide you with industry-leading tools all year, giving you a greater opportunity to optimize your score and drive higher Medicare reimbursements. Healthmonix's CMS Qualified MIPS Registry, MIPSpro, will leverage the data already captured in ModMed EHRs to provide access to more robust gaps-in-care tools, new insights into Cost category performance, and opportunities to track performance and report within new reporting frameworks such as MIPS Value Pathways (MVPs). Healthmonix and ModMed are better together.

MIPS is harder than ever,

yet incentives are at an all-time high if you can maximize performance. CMS has maintained a performance threshold of 75 points. Quality measures continue to be removed or topped out, while new reporting frameworks are being added.
It's more important now than ever to have a solution that will optimize your score through ever-increasing reporting options. MIPSpro users achieve a MIPS Quality score 10.73% higher than the national average.

IA–15%
Quality–30%
Cost–30%
PI–25%

Get real-time access to patients, providers, and measure dashboards
Enables targeted changes instantly, to workflows or measure calculations, that can greatly impact your overall MIPS performance.

Drill into individual patients, providers, and MIPS measures
Empowers you to attack gaps in care by identifying outlier providers, underserved patient populations and incorrect measure workflows.

Access your predicted Cost score through MIPS Cost Analytics
Provides access to the only platform that can show your predicted Cost score including your eligible cost measures and drill down capability into your Medicare claims data.

Live MIPS experts who support you through reporting and submission

Sales professionals
Solution matchmakers striving to ease client pain points.

Technical support
Data gurus ensuring seamless data integrations.

**Designated account manager
(100+ eligible clinicians)**
Trusted advocates supporting the unique needs of large groups with complex data.

Customer support
Product evangelists and MIPS experts guiding clients through reporting requirements and score optimization.

MIPSpro Packages	Retail
Basic (includes quality reporting)	$300
