

## **Jr/Mid-Level Full Stack Software Engineer**

**Healthmonix**, Malvern, PA

How would you like to join a growing company where your efforts will be pivotal to our success and where you'll be part of transforming healthcare quality?

Healthmonix enhances the quality and value of healthcare delivery to improve patient health and outcomes. Our cutting-edge platforms provide industry-leading SaaS-based value-based care solutions to measure and improve healthcare. We deliver transformative products and services that impact the healthcare industry. The work we do makes a difference.

Our team is everything to us. At Healthmonix we care about how we work together as much as we care about building and delivering state-of-the art software for our customers. Your work and happiness matter to us, as the results of your work will matter to the thousands of medical professionals, hospitals, private practices, and medical education associations who rely on our platform across the country.

We are seeking a junior-mid full stack .NET software developer to join an agile scrum team responsible for end-to-end development and delivery of our class leading MIPSpro product.

### **Job Description**

- Work closely with stakeholders, product owners, and team members to understand business requirements that drive the design of quality technical solutions.
- Develop applications to solve real-world customer needs.
- Participate in component and data architecture design, performance monitoring and product evaluation.
- Deliver quality, commercial ready code while creating a first-class user experience.
- Incorporate new technologies and provide creative solutions to difficult technical challenges.
- Deliver solutions that not only meet functional requirements but are scalable, reliable, secure, and optimized for performance.
- Provide support for issues reported during the development life cycle and production.
- Participate as a Scrum Team developer working closely with other Scrum Team members (Product Owner, Scrum Master, Quality Assurance team members, and other Development team members) to refine, score, develop, test and deliver user stories to add incremental value each sprint.
- Suggest new process improvements.

### **Required Skills**

- 2+ years of hands-on experience developing with ASP.NET (C#) and SQL Server.
- 1+ years of hands-on experience developing products hosted w/in the Azure cloud environment.
- 1+ years of hands-on experience developing MVC Web Applications.
- Deep knowledge of .NET Core

- Proven problem solver w/ strong communication skills and a mindset of individual responsibility.

### **Desired Skills**

- Experience developing and supporting a Docker hosted SAAS product.
- Experience with development patterns, such as TDD, DDD, BDD, SOA, IOC, and CQRS
- Experience with DevOps patterns and technologies, such as CI/CD, Octopus Deploy, TeamCity, and GIT.
- Experience with SDLC tools, such as JIRA, Confluence, BitBucket, and Zephyr
- Experience developing secure, SSO, HIPAA-compliant architectures that will withstand the scrutiny of external audits.
- Experience with Snowflake, Azure Synapse (Data Warehouse), Tableau or similar technologies.

BS in Computer Science, Information Systems or Engineering and/or 4+ years of equivalent industry experience in developing and deploying systems.

Scrum or ScrumAlliance certification are a plus.

You will operate in a small team environment with major responsibility, great visibility, and a potential bonus based on performance. You'll work alongside some of the top thought-leaders in healthcare services in a competitively paid environment with great benefits.
