

Healthmonix and Modernizing Medicine FAQs

Healthmonix and Modernizing Medicine have partnered to provide you with access to industry-leading tools year-round, giving you a greater opportunity to impact your MIPS score. MIPS is getting harder, and we can assist you with tracking MIPS performance throughout the year and gaining valuable insight into your Cost category score.

By partnering with Healthmonix, Modernizing Medicine clients will gain greater access to the MIPSpro Qualified Registry and Qualified Clinical Data Registry for 2024 MIPS reporting and beyond. Our integrated approach will help you optimize your MIPS score, drive higher Medicare reimbursements, and take the next step in your value-based care journey.

Question: I've used Healthmonix to report MIPS in the past. How is this different?

Answer: Healthmonix and Modernizing Medicine are updating our integration to bring you performance within your MIPSpro dashboard starting at the beginning of the year. This will provide more opportunities to use our gaps in care tools, work with our team of experts, and optimize your performance.

MIPS data will continue to update throughout the year, allowing you to track performance in measures, focus on measures that improve your score, close care gaps, and view your estimated score year-round. You will also gain access to new tools, including tracking performance in cost measures, assessing performance against MIPS Value Pathways, and using advanced analytics to gain deeper insight into your data.

Q: Can I still report on the same measures I did last year?

A: Healthmonix and Modernizing Medicine are working together to provide access to the same quality measures Modernizing Medicine clients have reported on in the past.

Q: How will Healthmonix get my data from ModMed EHR systems?

A: Healthmonix and Modernizing Medicine are integrating systems to easily transfer data from ModMed EHRs to MIPSpro. Once your MIPSpro account is set up and the integration is activated, your MIPS data will regularly update within MIPSpro, easing the burden of manually loading data into a different system. This will allow you to track performance, identify gaps in care, and improve your score.

Q: How will I submit my MIPS data to CMS?

A: You'll complete MIPS submission through MIPSpro using an easy, step-by-step validation process that provides you with tips along the way. With a few clicks, you can review your selected measures, anticipated score, list of eligible clinicians, and reporting framework before you submit your data to CMS.

Q: Can Healthmonix help me report MIPS Value Pathways (MVPs)?

A: Yes! Healthmonix will support all MVPs and provide insight into MIPS Cost category scores through MIPS Cost Analytics.

Q: Can I still use Healthmonix to combine data from EMA and my legacy EHR?

A: Yes. Healthmonix will continue to support combining data from multiple data sources to create full-year reporting. With our updated integration, this experience will be even better as you will have the opportunity to track performance across the combined data throughout the year. This includes combining data from multiple EHRs and multiple firms/pods within EMA, plus options for patient matching if needed.

Q: Are there additional fees to report with Healthmonix?

A: Yes. Healthmonix has multiple reporting options to best fit your reporting needs. Contact the Healthmonix team to review product and pricing options or visit the ModMed MIPSpro [store](#).

Q: When should I get started with Healthmonix?

A: You can contact the Healthmonix team today to determine your reporting needs, discuss product options, and prepare for a successful 2024 reporting year. Healthmonix and Modernizing Medicine are working together to provide an integrated MIPS experience for mutual clients starting January 2024.

Q: How do I get started with Healthmonix?

A: You can contact our team to review any questions you have or purchase MIPSpro licenses directly online at modmed.mips.healthmonix.com.

Q: Who do I contact if I have questions about Healthmonix?

A: Contact Maura Flaherty at mflaherty@healthmonix.com or 215-330-5253 to get started.
